- Teaching Assistant for *Deep Generative Models* course taught by Prof. René Vidal.

Spring 2020   **Research Intern**, Salesforce Research, Palo Alto, CA.
- Mentor: Dr. Yu Bai.
- Worked on obtaining a better understanding of feature learning in deep neural networks and a theoretical understanding of transfer learning.

2019   **Course Assistant**, Columbia University, New York, NY.
- Spring 2019: Course Assistant for *Deep Learning* taught by Prof. Iddo Drori. Responsibilities included holding office hours, grading and helping to design homeworks, and advising 5 groups of students with their final projects throughout the semester
- Fall 2019: Course Assistant for *Analysis of Algorithms* taught by Prof. Alexandr Andoni. Recipient of CA Fellowship with full tuition waiver for excelling as a Course Assistant

Summer 2018   **Research Intern**, The Curious AI Company, Helsinki, Finland.
- Researched techniques for modeling uncertainty in model-based reinforcement learning applied to factory control
- Trained various uncertainty models such as Bayesian neural network models for quantifying prediction uncertainty

Summer 2017   **Software Engineering Intern**, Facebook Inc., Menlo Park, CA.
- Worked on WPR (Whole Page Ranking) for Facebook Search on improving ranking of modules (Pages, Groups, People, etc.)
- Introduced new C++ API for module interleaving that allows quick prototyping of different strategies to interleave modules on the Search Engine Result Page
